

CLAX® Alfa

31A1

Detergent – base

Description

Clax Alfa is a liquid surfactant booster based on a blend of surfactants.

Key properties

Clax Alfa is an effective booster based on a blend of nonionic surfactants, anionics and soap. This product shows excellent performance on fatty/oily soil. Once removed from fabric, fat and oil are effectively dispersed by Clax Alfa, thus preventing redeposition. The presence of anionic and soap improves particulate soil removal. Clax Alfa is mainly used in conjunction with alkali/builder boosters. This combination of products ensures good removal and dispersion of fatty and oily soil, thus enhancing wash performance on heavily soiled goods such as cotton and polyester/cotton workwear and table linen. In addition Clax Alfa contains optical brighteners for application at all temperatures, which are stable in the presence of chlorine bleach.

Benefits

- Excellent performance on fatty and oily soil
- Good foam control properties - optimal use of washer mechanical action
- Ensures long-lasting whiteness (efficient optical brighteners)

Use instructions

Dosing levels are dependent on wash classification.

Recommended dosage is 2 - 4 g/kg dry goods and 4 - 9 g/kg dry goods for prewash and mainwash respectively.

Technical data

Appearance: Opalescent white liquid

pH (neat): 7,3

Relative density [20°C]: 0,997

Viscosity [mPa.s; 25°C]: 160

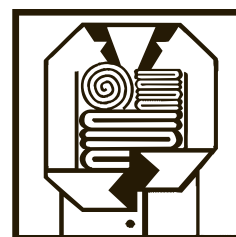

The above data is typical of normal production and should not be taken as a specification.

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Safety Data Sheet; sds.diversey.com.

Store in original closed containers away from extremes of temperature.

Only for professional users / specialists.
